<p>576.8 D 322 an</p>	<p>Dawkins, Richard</p>	<p>Ancestor's Tale: A Pilgrimage to the Dawn of Evolution</p>	<p>The renowned biologist and thinker, Richard Dawkins, presents his most expansive work yet: a comprehensive look at evolution, ranging from the latest developments in the field to his own provocative views. Loosely based on the form of <i>Chaucer's Canterbury Tales</i>, Dawkins's tale takes modern humans back through 4-billion years of life on our planet. As the pilgrimage progresses, the reader joins with other organisms at the 40 "rendezvous points" where we find a common ancestor. The band of pilgrims swells into a vast crowd as we join first with other primates, then with other mammals, and so on back to the first primordial organism.</p>

<p>597.33 C 268 de</p>	<p>Casey, Susan</p>	<p>Devil's Teeth: A True Story of Survival and Obsession among America's Great White Sharks</p>	<p>From its startling opening description of scientists racing to the bloody scene where a shark has decapitated a seal, this memoir-cum-natural and cultural history of the Farallon Islands—"the spookiest, wildest place on Earth"—plunges readers into the thrills of shark watching. Casey, a sportswriter with recurring dreams about deep-sea creatures, "became haunted" by the 211-acre archipelago 27 miles west of San Francisco when she saw a BBC documentary about Peter Pyle and Scot Anderson, biologists who study the great white sharks there. The islands are the only place on Earth where scientists can study the animals in their natural habitat. These evolutionary ancients (sharks lived 200 million years before dinosaurs) can be as large as Mack trucks, eat suits of armor, are both fierce and friendly, and, according to Casey, are an addictive fascination for those lucky enough to encounter them. Casey's 3-week solo stay on a yacht anchored in shark waters is itself an adventure, with the author evacuating just hours before the yacht disappeared in a storm. Her suspenseful narrative perfectly matches the drama and mystery of these islands, their resident sharks and the scientists who love them. (Amazon)</p>

Drawing on case studies from his practice, he outlines the progressive physical and psychological stages that, if unchecked, lead inexorably to life-threatening weight loss. Reacting to a societal obsession with thinness, adolescent girls at first delight in the sense of achievement they feel after successfully dieting away a few pounds—but then often suffer tragic consequences later.</p>
